1.Followers Comparison

Pixel Web Solution VS Alpharive Followers Comparison

2.Engagement Comparison

Conclusion

Based on the social media analysis of **Pixel Web Solutions** and **Alpharive**, it is clear that Pixel Web Solutions has a stronger Instagram presence compared to Alpharive.

Pixel Web Solutions has **12.7K followers** and receives **150–700 likes per post**, which shows higher audience engagement and reach. Their content mainly includes technology updates, company activities, and hiring posts that attract more interactions from followers.

On the other hand, Alpharive has **678 followers** and receives only **1–5 likes and 1–2 comments per post**, indicating lower engagement and a smaller audience base. Their content mainly focuses on festival posts, company updates, and hiring announcements.

Overall, Pixel Web Solutions performs better in terms of **followers, engagement, and social media visibility**, while Alpharive needs to improve its content strategy and engagement to grow its Instagram presence.
